How to capture social value at contract award and ensure measurable delivery.

1

Do you have any examples of provider's or sites that are able to monitor and manage social value outcomes, aggregate data, run reports etc?

We are not able to recommend any specific solutions, however here are a couple we are aware of:

- Thrive
- Cobblestone Software

2

We incorporate the minimum 10%, sometimes 15% for Net Zero/Social Value but we do struggle with the contract management side, so any help would be welcome.

We are happy to assist with any Contract Management requirements that you might have, and any other procurement or commercial related elements. Please contact us on delivery@exceeding.co.uk for a discussion on how we can assist you.

3

How can facilities management companies in UK use artificial intelligence for contract management?

In regards to this we would need more context. It is still very early days for applications of AI. AI would probably be more around data collection analysis rather than the contract management / reporting side.
